1 STEAM SHOWER

Bring the spa home with a restorative steam shower. Designed for spaces as small as three by three by seven feet, Mr. Steam's starter steam kit includes a steam head, control panel and generator that hides nicely in a cabinet.

2 AROMATHERAPY

The wellness trend of enhancing your space with an essential oil diffuser is still going strong. The latest way to unwind? A handheld shower by Moen in collaboration with Inly that can be fitted with scented capsules to transport you to the tropics, a lavender field and beyond.

5 VEINED SURFACES

Sumptuous slabs of marble, stone and quartz aren't just for counters. Veined surfaces are now being used to clad cabinet fronts, floors and walls. Dekton Slim makes it easier to get this streamlined, contemporary look, thanks to its durable, ultrathin four millimetre profile.

6 SUNSET SHADES

Cool water colours are taking a backseat this year, as terracotta and mustard make their way into bathrooms. Accessorize with towels, shower curtains and even sinks in these warm desert hues.

7 RETURN TO THE BAR (& DISH)

Artisanal soaps and dishes are seeing a revival, thanks to efforts to reduce plastic waste and support Canadian makers. Perch soap, or shampoo and conditioner bars on sculptural dishes next to the sink or in the shower for your next lather.

8 ARCHES

We can't get enough of the architectural arches that have been popping up in hotels, restaurants and homes recently. Now influencing bathrooms, this trend takes life in the form of curvy shower doors or arched mirrors that achieve the look for less.
